Science has always played a decisive responsibility in developing the observance level of a person

Technology, business participants in a key position for securing the grid from cyber threats. Yet, this immerses itself in digitization and built-in technologies, the enterprise is going through the expanded approach for appreciation of their ideas into rocket science. Science has usually played a decisive accountability in growing the observance degree of for a man and woman as we continually prompted my college students to be aware of the modern day technologies.

Bring attention among the science which brings the innovation, which is necessary as much as Teaching in college which supposes to be an essential way to help students being greater and innovative with the usage of technology. Also, it is our ethical responsibility and privileged for the teachers who teaches the future technocrats and delivers the core ideas of science and technologies combination that should be taught in the classroom. You will analyze the exceptional components associated with the technological areas in which the individuals and devices are associated and how to use them. You will explore the multilingual, chronological, revolutionary built-in modules which can be put in force of data. You will additionally construct your information using different tools that will adhere to records and related areas. These include strong passwords, biometrics, two-factor authentication, and firewalls.

Being a professional faculty from the past 15+ years, it is integral for us too to continue to be up to date regarding the new technologies that come over time. With the assist of articles like Cybernomics, it will become simpler for human beings round the globe, recognize an exclusive point of views and come to be aware. The cause that such thoughts and points performs a necessary role is that all of us have get right of entry to the extraordinary aware ideas and technology round us. When there is an idea there must be the coaching to propagate, if doesn’t lead that thinking into suited way there comes the risk of misleading the idea into no use. If people would not be aware of the attacks on the internet or how they can be cautious while the use of positive equipment and applications. They may additionally get themselves into danger.

Various conferences take location on rocket science to make college students and teachers concerned with the primary principles and strategies of more than a few strategic areas to innovate and design. As a faculty, educating our college students so that they can be aware of the discipline of technologies, the upcoming innovations and how they have an effect on us is very important.

We have a responsibility to train such innovative minds so that they will grow one’s information and unleash their skills. They are observing this in more than a few fields of their careers, thus, making us proud. We are privileged and enthusiastic for turning into a guest editor for a month and acknowledged to Scholastic Seed Inc. and the entire crew of Cybernomics. We hope that this difficulty will convey consciousness in the cyber world and advantage the society by a large aspect.

Ms. Rajbala Simon
Asst. Professor, Dy. Superintendent, Examination, AIIT

Ms. Rajbala Simon is working as Professor in the Amity Institute of Information Technology department within 20 years. in academics; Her areas of interest include Agile Software development, Software Engineering and Soft Computing Approaches. Published more than 20 research papers in International and National Conferences and Journals in SCOPUS Impact Factor Journals and conferences. She has been a part of various sessions in International Conferences and session chair in a few conferences. She has organized various guest lectures, workshops and faculty development programmes. She has been an Associate Editor in a reputed journal and has to her credit a few books related to computer science. She is actively involved in research activities in the institute and is a member of IEEE. She has been an integral part of the Examination system at AIIT and under her leadership students developed a website examitian.com to help them to prepare well for the upcoming examination.

Dr. Laxmi Ahuja PhD (CSE) working as Professor in Amity Institute of Information Technology with the role ranging from Lecturer to Professor to Dy. Director of the Department within a span of 20 years. in academics; Her areas of interest include Search Engine, Data Mining and Soft Computing Approaches; published more than 80 research papers in International and National Conferences and Journals in SCOPUS Impact Factor Journals like Springer, Elsevier, Inderscience and several others. She has successfully filed a number of patents under the domain of Information Technology as an Inventor, which has been published in “International Journal of Patents” by Patent Department, Govt. of India. She has published many Lecture Notes for Springer Book chapter. Organized various sessions in International Conferences and Session chair in various Conferences. She has organized various Guest Lectures, Workshops and Faculty Development Programmes. She is Associate Editor of Proceedings of the International Conference on Reliability, Infocom Technology and Optimization (Trends and Future Directions). She is actively involved in research activities. She has currently Eight research scholars under her guidance and supervised three students for PhD. She has also published a number of books related to the operating system and Information Technology. She is Member of IEEE and Life Member of Computer Society of India, Past Vice-chairman of IETE -The Institute of Electronics and Telecommunications Engineers, Senior member of IACSIT, Member of IEEE Society. She is actively involved in various activities of these societies. She is also Technical Chair member in many Conferences.
